Sponsorship overview

Hackathons are invention marathons. Programmers, designers, builders, and creative minds come together to learn, build, and share their ideas over an intense weekend.

ETHack is a student-run hackathon and symposium taking place at ETH Zurich in mid-September, 2027. Under the theme ***Resilient Futures***, students from across the ETH Domain and UZH will build solutions that help society withstand and recover from shocks, from climate disasters to technological disruption.

Over two days, 100 students will **hack** for 24 hours on 3 challenges, then pitch their prototypes to a jury for prizes. Alongside the hackathon, a **symposium** brings leading speakers together to discuss resilience in our environment, human potential, technology, and inclusion.

Your company can connect with motivated and purpose-driven students by sharing your latest APIs, tools, datasets, or challenges. Host a talk at the opening plenary, set one of the three challenges, mentor teams, and meet talented students over networking lunches.

Beyond the tiers in this document, we welcome custom add-ons such as a branded mini-event, a networking lunch or coffee break, co-branded merchandise for participants, or any other creative idea. Feel free to contact us!

Sponsorship Packages

Take advantage of the **early bird discount**, from now till 30 November 2026!

	Platinum *CHF ~~10,000~~ **7,000*** *(limited spots)*	**Gold** *CHF ~~5,000~~ **3,500***
